

new side fill co-branded filtering water bottles

join the fight against the water crisis

Hydros, an innovative socially and eco-conscious company, develops products that provide active consumers easy access to great-tasting, filtered water on the go. The company's signature product, the Hydros Filtering Water Bottle, is the only water bottle on the market with a patent-pending Fast Flow Filter™ that filters water on entry, filling the bottle in just 20 seconds. A cost-effective alternative to bottled water, Hydros Bottles can be used at any water tap or fountain; on average, each filter saves consumers \$400. Every bottle sold helps fund sustainable water infrastructure projects worldwide and provides clean water to someone in need for one whole year through Operation Hydros®.
